Early Access Watcher Public Service Announcement Game: Integrity Version: Initial Release Gameplay Footage:

<https://www.youtube.com/watch?v=ITA5NpJx1Dc> Disclosure: This game copy was bought by the reviewer. I knew what I was jumping into the moment I saw the trailer, but I couldn't make a Curation for this in good faith without playing it. As soon as I loaded up, I was greeted with a single player and multiplayer option along with a link to the program's website. The lack of an options menu was the first warning sign. The second was the obvious Unreal Asset usage. I can accept the second issue if any effort was put toward making a decent first impression, but all that I saw going into the game was a sledge hammer that breaks after seven or so swings, a container with random items inside and a fire that serves no purpose. The map is flat with trees, stumps and a few plants scattered about and has no borders to hold the player inside should they venture to close to the edge. Should the player fall off, they are treated to a view of the asset diagrams and the default sky as they either quit or wait for death. The biggest offense is with the lack of music and bare minimal sound made by the weapons. It was at this point that I could write off Integrity as the barebones submission that it was. Avoid this purchase like the plague, but any sane person has already looked at the video posted to the store page and done so. This has been an EAW PSA.. I would love to play this magnum opus of a game yet no one seems to be connecting to my server when I want to play. This must be some kind of mistake or bug that may need to be fixed in a future update. I would also like to say that the gun models look super GNARLY!!! I almost couldn't play because of how astounded I was at the quality of the graphics in this game. I wish that there would be a sniper that could be added into the game to make it more TACTICOOOL to enhance my GAMER EXPERIENCE. If you want to see a montage of my EPIC GAMER SHOTS please visit my twitch.tv/miekshreds to see the most EPIC GAMER SHOTS in this game's history. Thank you for this amazing experience. This game is leading the next generation of gaming! It also helped to cure my depression after my wife left me for her boyfriend. I never thought there could be such a perfect game yet here it is. Thank you very much for this experience. nay this gift of a game.. If there's one thing about Integrity, it is that it has none by selling a \$376.99 DLC in its barebone state. Seriously this must be a effin' joke. Edit the ghillie suit DLC is now at the new low price of just \$322.99, however you could just own a real one here at <https://www.amazon.co.uk/Nitehawk-Military-Camouflage-Woodland-Ghillie/dp/B00FLVVJIK/ref=sr12?ie=UTF8&qid=1511730321&sr=8-2&keywords=ghille+suit> for a modest \$329.95. I could get this, suit up and go to my local golf course and play Integrity for free.. Its a good game a bit rough on the guns but it looks good. "It takes time to make a good game" -Steven Hawking..
